

maxim

THE SMALLER RANGE OF MAXIM
LIGHTING CONTROL CONSOLES

The maXim Small (S) and Medium (M) are the perfect lighting consoles for the control of smaller productions and are ideal for schools, theatres, and other medium sized venues. The maXim S and M lighting consoles are a great learning tool for the budding lighting designer and powerfully packed with the necessary features for creating more advanced lighting designs.

Both models can be operated in either 'live mode' or 'pre-recorded show mode' giving you, the user, total flexibility. For more complex shows the maXim S and M can simultaneously playback multiple scenes and chases together with a fully-loaded theatrical style Cue Stack Go button.

As with all LSC products, the maXim S & M are built tough for the rigours of touring and come with UPS (Uninterrupted Power Supply) as standard. Therefore, you can be assured that if you lose power you won't lose your programming.

Ideal for: Schools, Places of worship, Local Theatres, Nightclubs, Bars, Fashion/Corporate Shows, Rental Companies.

To find out more, contact your local LSC dealer or go to www.lsdighting.com
